

Dear Dr. Majid Sharolli:

When my husband (Jeff Bulow) started taking time out of his busy schedule as a technical salesperson to have his teeth worked on, I knew there was something special about your dental office!

He had a cap on his front tooth that had turned yellow over the years and now not only does his front tooth look natural and white but his whole smile looks brighter. Bleaching his teeth made a big difference in his appearance. He also has some new fillings that blended in with his tooth color so nicely I couldn't even tell he had them. He told me that the whole process was painless and done very quickly.

I myself, hadn't been to a dentist in over two years. I liked the way you took the time to explain what you were going to do to my teeth and you gave me some options. You showed me the proper way to clean, floss, and maintain my teeth. I also had my old fillings replaced! The retainer that you customized for me is very comfortable and I know it will help prevent further damage when I grind my teeth.

Diana, your patient coordinator is so nice and very helpful! The two of you together make a great team, and our family has been so pleased with your services.

Thank you both for your professional services, your honesty, and your always being on time! We all look forward to our next visits.

Sincerely,  
Jeff, Diana and Greg
