Plano, TX 75024

Dear Dr. Sharolli:

When we moved to Plano a few years ago, one of my lower priorities was to find a new dentist. Frankly, my experiences with dentists, dating back to childhood were not good. That coupled with growing up without fluoride in the water and soft teeth meant many hours in the dreaded dental chair. My dental habits were not good and my interest in finding a new dentist ranked below finding a plumber. Then I met you Dr. Sharolli, and things changed.

You had a unique way of explaining the impact that bad teeth and dental hygiene could have on my overall health. You did the first repair work in my mouth that did not cause incredible pain. Eventually you replaced a very large number of deteriorating fillings and put my mouth in tiptop shape. You kept working on me to floss. Now that was a hard sell. It took a couple of years, but now I have seen the light and am a dedicated flosser. Finally, you explained what impact the alignment of my bottom teeth was having. You suggested Invisalign. I will tell you that I would never have considered having braces on my teeth, or any other method of straightening had it been suggested by any else but you. We went ahead with it, and now a few months later, I have straight teeth. Wow, what a change, and such an easy process.

Now I understand that you will be moving on to another part of the country. This is a great loss for Plano, Texas and for me personally. Please go with the knowledge that what you are doing is a great thing and you have the talents to change people. Keep up the good work.

Very sincerely,
